

EADM in automatic mode for example analyzed the performance of 50 LPARs of your DATA CENTER z OS for 6 months. You have in your hands the Word studies and alerts generated by EADM. For the past 3 years, we have seen new data analysis tools called BIG DATA. The word BIG DATA is very vague, this new tool will analyze data on .txt files of .xls files from Database Access or SQL files, etc But it's up to you to know what you want to analyze !!!! And sometimes it's complicated. The new **BIG DATA EADM** feature will help you in your business; performance management.

Example:

Of the 50 LPARs analyzed for 6 months, EADM will give the following recommendations.

LPARs 0002 and 0003 often have problems of **DISC TIME** between 2pm and 3pm on Tuesday, it is serious

LPAR 0045 has a lot of **IOSQ** for 2 hours between 8pm and 10pm on Sunday, it does not matter

LPARs 0009 0010 and 0033 have I / O overloads on Wednesday at 9am and this causes an increase in PENDING TIME

With this information you know what and when
